

Independent Schools
Examinations Board

CE AT 13+

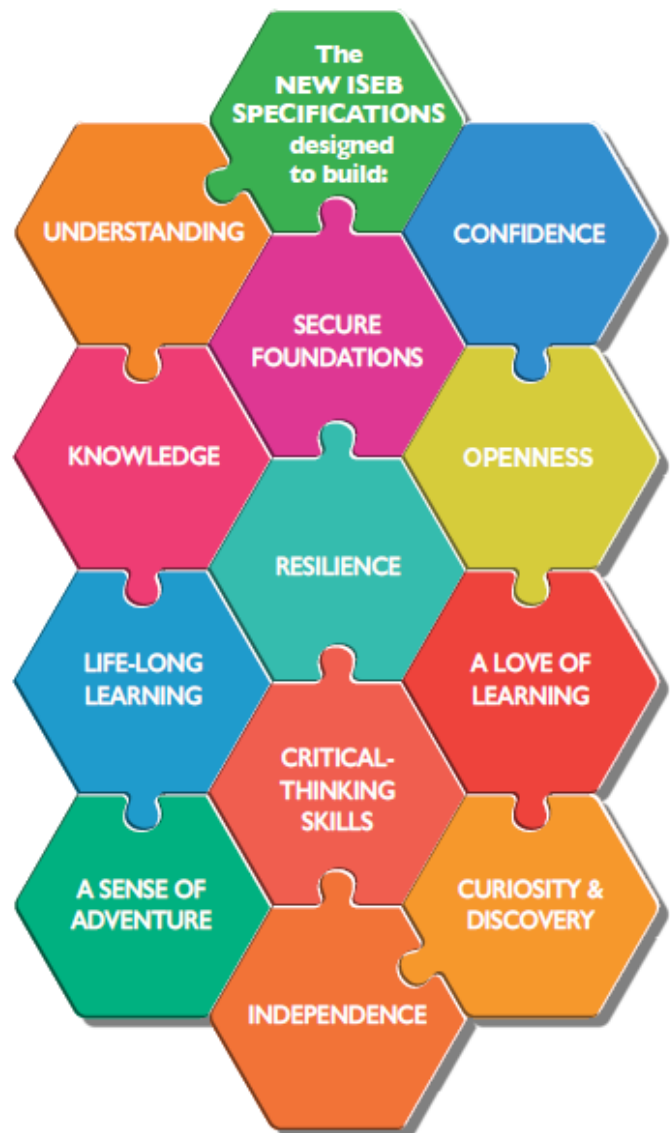

COMMON ACADEMIC SCHOLARSHIP AT 13+

GEOGRAPHY

Specification

For teaching from September 2021 onwards

For examinations from November 2022 onwards

ISEB CORE AIMS

Pupils who have pursued a course of study based on CE specifications and assessments will:

- be equipped not only for the next stage of their education, but for life-long learning based on a secure foundation of subject knowledge, concepts and skills and be able to apply what they know to new situations
- be enthusiastic learners who are open to new ideas and experiences, curious, questioning and keen to experiment.

They will:

- enjoy reading and be able to articulate clearly orally and in writing
- have the confidence to think, weigh up evidence and make up their own minds, and the resilience to learn from their mistakes
- have the skills to work independently and collaboratively
- understand how subjects connect with each other
- demonstrate cultural and environmental awareness and empathy, developing an understanding of their place in the world.

INTRODUCTION

The ISEB geography specification develops elements from key stage 2 and key stage 3 of the National Curriculum and offers a framework of physical, human and environmental themes. It provides opportunities for a variety of teaching and learning approaches, and has been designed to encourage the teaching of a range of geographical skills, whilst also developing pupils' knowledge and understanding of the world in which they live and to which they can contribute.

The flexibility of the specification means that a programme of study leading to the CE examination may be spread over several years. When tailoring courses, teachers might find it helpful to know that the topic areas which are considered largely within the reach of Year 5 and Year 6 pupils have been italicised in this specification (see pages 10-15).

Although it is recommended that topical, real-life case studies and 'breaking news' events are used in teaching to illustrate processes, to engage pupils and to develop their understanding, the questions in the examination will be designed to test this understanding rather than merely factual recall. Candidates may refer to examples they have studied if it helps to show their understanding of a process or a feature, but questions in the examination will no longer demand this level of specific detail.

Given the opportunities in geography for individual and group activities, investigations, discovery learning and research through extended project work, teachers are reminded of the ISEB Project Qualification, which provides accreditation for extended project work.

At the end of the CE course, pupils will be equipped with a secure foundation of subject knowledge, concepts and skills for the next stage of their education.

SPECIFICATION CHANGES AT A GLANCE

A summary of the key changes in this specification:

What has been taken out:

Weathering

Types of Erosion

ALL rote-learned case studies of:

- an earthquake or volcanic eruption
- a flood (either river or coastal)
- a planned or completed housing/facilities project
- a planned or completed transport project
- any multi-national company operating in a developed/developing country/countries.

The *requirement* to draw diagrams (although candidates may do so if they wish) of:

- plate boundaries
- rainfall
- waterfall
- eroded headland - arch, stack etc.
- spit (longshore drift)

Detailed understanding of industrial processes and economics

The capital cities of some of the more minor countries from the Rest of the World section

What has been added in:

Environmental Issues:

- local environments
- National Parks
- global warming and associated hazards
- pollution.

Introductory GIS (Geographic Information Systems) through use of *Digimap*

AIMS

This specification is designed to develop the following learner attributes:

- enjoyment and curiosity
- independence and teamwork
- problem-solving ability
- a sense of place
- an understanding of citizenship, environmental stewardship and sustainable development
- a sense of their place in the world and how they engage with it
- acquisition of a solid foundation of geographical knowledge.

ASSESSMENT OBJECTIVES

In the 13+ CE assessment, candidates will be assessed on their ability to:

A01	use geographical enquiry skills when developing knowledge and understanding of places, people, patterns and processes, environmental awareness and sustainable development.
A02	ask geographical questions and undertake enquiries inside and outside the classroom about places, people and environments.
A03	analyse evidence, make decisions and evaluate information, ideas and opinions.
A04	use skills specific to geography, including those of fieldwork, map reading and introductory Geographic Information Systems (GIS).
A05	draw on many different sources and resources, such as maps, atlases, photographs graphs.

GEOGRAPHICAL SKILLS

In developing geographical skills, candidates should be taught to use an extended range of geographical vocabulary (*a separate glossary of suggested words is available on the Schools/Subject Information page on the ISEB website*).

Location Knowledge

Atlas skills should be developed, and location knowledge is required (*see Appendix I*).

Ordnance Survey Map Reading

Candidates must be familiar with OS 1:25,000 and 1:50,000 scales of mapping.

Candidates should be able to:

- use map symbols
- recognise direction/orientation (8 points of the compass)
- estimate distance (in kms & metres)
- estimate area (in km²)
- use 4-figure and 6-figure grid references
- use eastings, northings
- recognise spot heights and contours
- follow routes
- identify general relief and landscape features (slope steepness, flood plain, valley, headland, bay etc.)
- identify land use and general surface vegetation
- use maps in decision-making
- recognise site, situation and shape of settlements.

Fieldwork and Enquiry skills

Data collection: candidates must collect primary data on their own or as part of a group. They may use:

- questionnaires
- sampling
- surveys, e.g. shopping, traffic and pedestrian counts
- environmental quality surveys
- land use mapping
- field sketches.

Secondary sources, including internet data, may be used to supplement, but **not** to replace, the essential primary data.

Presentation: candidates may present their data in a variety of ways:

- maps, including shaded (choropleth) maps, annotated sketch maps, flow maps
- annotated field sketches and photographs
- graphs, including line graphs, bar charts, divided bar charts, pie charts, histograms, pictograms
- sketch sections
- GIS data land-use maps (for example, as compiled through *Digimaps*).

ASSESSMENT

CE at 13+	Marks		% of final mark
Fieldwork enquiry	40		20%
Written examination	80	60 minutes	80%

Fieldwork enquiry

Allocation of marks	Marks
Introduction	4
Methods of data collection	8
Results/presentation of data	8
Data analysis & conclusion	8
Evaluation	4
Fieldwork expertise	8

All mark sheets (see *Appendix V*) will be sent to senior schools with the coursework, which may be submitted electronically, or as a hard copy.

It is recommended that parts of the Year 6 and Year 7 schemes of work include local fieldwork enquiries, e.g. microclimate of school grounds, shopping surveys, local river and coast enquiries.

Any geographical work undertaken outside the classroom constitutes fieldwork. For the purposes of assessment, it must involve some primary data collection. The fieldwork should be included, where appropriate, in the teaching of the specification but can also extend to topics beyond the specification, provided that the prescribed format for the investigation and write-up is followed. (See *Appendices III, IV and V.*)

Written examination

Each paper will contain an Ordnance Survey map and colour resources (photographs and/or diagrams)

The format of the paper will be as follows:

	Marks
Section A Location Knowledge	10-15
Section B Ordnance Survey Map Reading	10-15
Section C Physical Geography	25-30
Section D Human & Environmental Geography	25-30

FURTHER ASSESSMENT DETAILS

Section A: Location Knowledge (10-15 marks)

The questions are to be answered using outline maps of the British Isles, Europe and other individual continents or maps of the world. The questions will be confined to the features and places listed in Appendix I. Outlines of mountain ranges and deserts, courses of rivers and dots to represent the locations of cities will be given.

Section B: Ordnance Survey Map Reading (10 -15 marks)

This section will comprise Ordnance Survey mapwork questions. Ordnance Survey map extracts to the scale of 1:50,000 and 1:25,000 will be used and a key to conventional symbols will be provided. The map extracts may be of any part of the United Kingdom (Great Britain & Northern Ireland).

Section C: Physical Geography (25-30 marks)

This section will contain **two** questions, which will be based on any of the following predominantly physical topics:

- **Tectonics** (Earthquakes & Volcanoes)
- **Meteorology** (Weather & Climate)
- **Geomorphology** (Rivers & Coasts).

Photographs, maps, diagrams, graphs and data tables may be used as stimulus material. Questions will include a mix of multiple choice, data response, short answers and extended answers.

Section D: Human & Environmental Geography (25-30 marks)

This section will contain **two** questions, which will be based on any of the following predominantly human and environmental topics:

- **Demography** (Population & Settlement)
- **Economy** (Transport & Industry)
- **Environment** (Sustainability & Stewardship).

Photographs, maps, diagrams, graphs and data tables may be used as stimulus material. Questions will include a mix of multiple choice, data response, short answers and extended answers.

SCHOLARSHIP

Common Academic Scholarship		Marks	60 minutes
Section A	data-response questions	50	30 minutes
Section B	essay and structured questions	50	30 minutes

The Common Academic Scholarship Examination is based on the 13+ CE specification. The 60-minute paper will be divided into two sections, and candidates will be required to answer one question from each section. Candidates will also be required to carry out a fieldwork enquiry (*see above*).

FURTHER ASSESSMENT DETAILS

Section A: data-response questions (50 marks)

This section will comprise two questions. One question will be based on physical geography and the other on a human geography or environmental topic.

Section B: essay and structured questions (50 marks)

This section will consist of six questions. These will include essay questions as well as more structured questions, containing extended writing.

THEMATIC STUDIES

Candidates for the CE examination are required to study six themes:

- **Tectonics** (Earthquakes and Volcanoes)
- **Meteorology** (Weather and Climate)
- **Geomorphology** (Rivers and Coasts)
- **Demography** (Population and Settlement)
- **Economy** (Transport and Industry)
- **Environment** (Sustainability & Stewardship).

Topic content appearing in *italics* within the following tables, is considered suitable for study in Year 5 and Year 6.

TECTONICS (EARTHQUAKES & VOLCANOES)

Topic Strand	Focus	Key Elements
Earth's structure	<i>the Earth's four layers</i>	<i>identify crust, mantle, outer core & inner core on a cross-sectional diagram of the Earth</i>
Earth's crust & tectonic plates	<i>oceanic & continental crust</i>	<i>understand the main differences between the two types of crust</i>
	<i>convection currents</i>	<i>understand how heat causes movement in the mantle and the movement of plates</i>
	<i>constructive & destructive plate boundaries</i>	<i>explain the different tectonic processes and movements and their consequences</i>
Volcanoes & earthquakes	<i>the global distribution of volcanoes & earthquakes</i>	<i>describe and explain the location of tectonic hazards on a world scale</i>
	<i>the nature and causes of volcanic eruptions</i>	<i>recognise the features of active volcanoes and understand the processes by which they are formed</i>
	<i>the nature and causes of earthquakes</i>	<i>understand the causes of earthquakes</i>
Tectonic hazards	the environmental, human and economic effects of tectonic hazards	recognise the impacts, both immediate and long-term, that can follow volcanic eruptions and earthquakes
	human responses to tectonic hazards	appreciate the difference in human response shown by high and low-income countries

METEOROLOGY (WEATHER & CLIMATE)

Topic Strand	Focus	Key Elements
Weather & climate	<i>the difference between weather and climate</i>	<i>appreciate that weather is the short term (day to day) variation in the condition of the atmosphere whereas climate consists of general weather (temperatures & precipitation) patterns over many years</i>
	<i>how humans can be affected by weather and climate</i>	<i>understand the ways in which weather and climate can impact on human lives and economic activity</i>
	weather/climate hazards	recognise hazards associated with global warming, such as drought and hurricanes/ tropical cyclones
Earth's main climate zones	<i>climate zones (based on temperatures and precipitation)</i>	<i>understand the influence of latitude on climates around the world</i>
The climate of the British Isles	the pattern of climate and main causes of temperature and rainfall variation from place to place in the British Isles	understand the influence of latitude, altitude, relief, prevailing winds, distance from coast and the impact of the North Atlantic Drift and the Jet Stream understand relief, frontal & convectional rainfall
Microclimate	<i>the influence of aspect, shelter, buildings, surface and natural features in relation to microclimates</i>	<i>appreciate the variations in temperature and wind speed within a small outside area, such as a garden or school grounds</i>

GEOMORPHOLOGY (RIVERS & COASTS)

Topic Strand	Focus	Key Elements
Rivers	<i>river basins</i>	<i>recognise catchment areas, watersheds, river valleys, tributaries, confluences & floodplains on OS maps & aerial photographs</i>
	<i>the long profile of a river and the characteristics and features of upper, middle and lower stages</i>	<i>understand how a river (and its valley) changes in appearance from source to mouth</i> <i>recognise river features such as spurs, rapids, waterfalls, meanders, flood plains & deltas and know at which stage they are found</i>
	<i>features of river erosion</i>	<i>understand how river erosion causes the development of valleys, and waterfalls</i>
	<i>how a river transports its load</i>	<i>understand the ways in which material of varying size may be transported</i>
Coasts	<i>coastlines</i>	<i>identify major coastal features on OS maps & aerial photographs</i>
	<i>major features of coastal erosion</i>	<i>recognise features such as bays, headlands, cliffs, wave cut platforms, caves, arches, stacks and stumps and be able to describe how they are created</i>
	<i>how the sea transports eroded material</i>	<i>describe and explain the process and occurrence of longshore drift</i>
	<i>major features of coastal deposition</i>	<i>recognise features such as beaches and spits and be able to describe how they are created</i>
Flooding	<i>flooding by rivers and/or sea</i>	<i>understand the causes and effects of river and coastal flooding</i>
	<i>the use of flood defences</i>	<i>recognise examples of soft and hard engineering defences and be aware of costs versus benefits</i>

DEMOGRAPHY (POPULATION & SETTLEMENT)

Topic Strand	Focus	Key Elements
Population	<i>population numbers and population density for the UK, Europe and the world</i>	<i>appreciate that human populations are unevenly spread - some places are crowded and others empty</i> <i>understand some of the factors that account for this uneven distribution</i>
	<i>how the population of a country may rise or fall</i>	<i>understand birth rate, death rate and migration and appreciate how they interact to determine the population of a country</i>
	<i>the Population Explosion</i>	<i>appreciate the rapid rise in the global human population and consider the consequences for humans and the planet, now and in the future</i>
Migration	what causes people to migrate	understand migration in terms of push and pull factors, rural to urban migration and migration from low to high-income countries
Settlement	<i>the reasons for the location, growth and nature of individual settlements</i>	<i>recognise, from OS maps or sketch maps, different types of settlements (incl. village, town and city) and their characteristics in terms of size, shape and functions</i>
	<i>the relationship between settlement size and the provision of goods and services</i>	<i>understand how the range and number of services varies with settlement size</i>
	the management of urban development	appreciate how towns and cities can be made attractive and healthy for their population consider how settlement growth can be managed to safeguard the natural environment

ECONOMY (TRANSPORT & INDUSTRY)

Topic Strand	Focus	Key Elements
Transport	<i>the principal modes of transport - walking, cycling, road, rail, sea and air - together with their advantages & disadvantages for moving goods & people</i>	<i>appreciate how factors such as distance, load, speed, convenience and cost will influence the choice of transport for a particular journey</i>
	<i>transport routes and networks</i>	<i>recognise how places are linked to each other</i>
	<i>containerisation and its associated transport infrastructure</i>	<i>appreciate how containerisation and modern facilities such as ports and air terminals facilitate global trade</i>
Industry	<i>the different types (sectors) of economic activity: primary, secondary, tertiary, quaternary</i>	<i>be able to classify a variety of jobs in any one of the four economic sectors e.g. farmer = primary</i>
	<i>the geographical factors that determine the location of economic activity</i>	<i>understand how site, power, transport, labour supply and market determine the location of economic activity</i>
		<i>recognise that industries may grow and decline over time</i>
Development	high, middle and low-income countries	recognise the difference between high, middle and low-income countries
	the relationship between the level of economic development and the proportion of people working in each sector	understand the shift of employment from the primary sector to secondary, tertiary and quaternary sectors and relate this to development and economic prosperity
	the relationship between economic development and quality of life within society	understand terms including: income per person, life expectancy, health, literacy and housing and recognise how these may improve through economic growth

ENVIRONMENT (SUSTAINABILITY & STEWARDSHIP)

Topic Strand	Focus	Key Elements
Local environmental issues	<i>how environments may be improved through one's own actions</i>	<p><i>recognise the nature of the school environment, its environs and location</i></p> <p><i>investigate how this environment has changed over time</i></p> <p><i>explore the sources and extent of pollution near the school and consider how this may be reduced in the future</i></p>
National environmental issues	<p>how environments can be protected and managed for sustainable benefit</p> <p>renewable versus non-renewable energy sources</p>	<p>appreciate, by studying (or possibly visiting) a National Park or AONB, the attractions for visitors</p> <p>understand how the environment is maintained and enhanced on a sustainable basis</p> <p>understand the difference between renewable and non-renewable energy sources in the UK</p>
Global environmental issues	<p>global warming: causes, current and predicted consequences and possible solutions</p> <p>pollution: causes, current and predicted consequences and possible solutions</p>	<p>understand some of the causes and possible consequences of global warming and climate change e.g. sea level rise, droughts, wildfires, floods</p> <p>be aware of possible solutions to global warming and climate change</p> <p>recognise air, water and land pollution and be able to suggest how each can be reduced</p>

APPENDIX I

LOCATION KNOWLEDGE

Questions will be set only on locations shown in this Appendix. It is expected that those in ***bold italics*** will be known at age 11+.

THE UNITED KINGDOM AND EUROPE

Major physical features	Continents	<i>Europe</i>
	Mountain ranges	<i>Alps, Pyrenees</i>
	Oceans	<i>Atlantic, Arctic</i>
	Seas	<i>Mediterranean</i>
	Rivers	<i>Rhine</i>
Other features		<i>Arctic Circle, North Pole, Prime Meridian</i>
British Isles	Countries	<i>England, Wales, Scotland, Northern Ireland, Rep. of Ireland</i>
	Sea areas	<i>English Channel, Irish Sea, North Sea</i>
	Rivers	<i>Severn, Thames, Trent, Clyde, Shannon, Mersey, Tyne</i>
	Upland areas	<i>Grampians, Lake District, Pennines, Snowdonia</i>
	Islands	<i>Anglesey, Channel Islands, Isle of Man, Shetlands, Isle of Wight</i>
	Major cities	<i>Aberdeen, Belfast, Birmingham, Bristol, Cardiff, Dublin, Edinburgh, Glasgow, Leeds, Liverpool, London, Manchester, Newcastle, Norwich, Plymouth, Southampton</i>
Countries and their capitals	Europe	<i>Belgium (Brussels), Denmark (Copenhagen), France (Paris), Germany (Berlin), Greece (Athens), Iceland (Reykjavik), Italy (Rome), Netherlands (Amsterdam), Norway (Oslo), Poland (Warsaw), Portugal (Lisbon), Russia (Moscow), Spain (Madrid), Switzerland (Bern)</i>

THE REST OF THE WORLD

Major physical features	Continents	<i>Africa, Asia, North America, South America, Oceania, Antarctica</i>
	Mountain ranges	Andes, <i>Himalayas</i> , Rockies
	Deserts	Sahara, Arabian
	Oceans/seas	<i>Atlantic, Arctic, Indian, Pacific, Southern Oceans, Red Sea</i>
	Rivers	<i>Amazon</i> , Mississippi, <i>Nile</i> , Yangtze (Chang Jiang), Ganges
Other features	<i>Arctic Circle, Antarctic Circle, Equator, International Dateline, North Pole, South Pole, Prime Meridian, Tropic of Cancer, Tropic of Capricorn</i>	
Countries and selected capitals	Africa	<i>Egypt (Cairo)</i> , Ethiopia (Addis Ababa), Ghana, Kenya (Nairobi), Nigeria, <i>South Africa (Pretoria)</i>
	North America	Canada (Ottawa), Mexico (Mexico City), <i>USA (Washington DC)</i>
	South America	<i>Argentina (Buenos Aires), Brazil (Brasilia)</i> , Chile, Colombia, Peru (Lima)
	Asia	Afghanistan, Bangladesh, <i>China (Beijing), India (New Delhi)</i> , Indonesia, Iran, Iraq, Israel, <i>Japan (Tokyo)</i> , Pakistan, <i>Russia (see Europe)</i> , Saudi Arabia, South Korea, Thailand, Turkey (also in Europe)
	Oceania	<i>Australia (Canberra)</i> , New Zealand, Papua New Guinea
Other major cities and city states	Dubai, Hong Kong, Kolkata, Los Angeles, <i>New York</i> , Rio de Janeiro, Sao Paulo, Shanghai, <i>Sydney</i> , Vancouver	

APPENDIX II

COMMAND WORDS

Used in CE and Common Academic Scholarship papers

annotate	add descriptive explanatory labels
choose	select carefully from a number of alternatives
complete	finish, make whole
define	give an exact description of
describe	write down the nature of
develop	expand upon an idea
explain	write in detail how something has come into being and/or changed
give	show evidence of
identify	find evidence of
list	put a number of examples in sequence
mark and name	show the exact location of and add the name
name	give a precise example of
select	pick out as the most suitable or best
shade and name	fill in the area of a feature and add the name
state	express fully and clearly in words
study	look at and/or read carefully
suggest	propose reasons or ideas for something

scholarship only

discuss	present viewpoints from various aspects of a subject
elaborate	similar to expand and illustrate
expand	develop an argument and/or present greater detail on
illustrate	use examples to develop an argument or a theme

APPENDIX III

GEOGRAPHY FIELDWORK ENQUIRY (YEAR 8)

What constitutes fieldwork for CE?

Fieldwork for CE and Common Academic Scholarship Examination candidates consists of investigative geographical studies which are undertaken outside the classroom. It must involve the collection of primary data by the candidate, based on one or more clear key questions (hypotheses) which ideally (but not necessarily) link with a theme or topic contained in the current specification.

Advice on the suitability of specific investigations can be sought from senior schools or from the setting team leader. The most important element is that pupils connect with the outdoor environment by accurately collecting, measuring and recording data themselves.

Must each candidate undertake a separate enquiry?

No. What a candidate does for his or her investigation will depend very much on the time and opportunities available to each school. Investigations may be based on an individual's data collection or on data gathered as a small or large group. The writing up, however, is the responsibility of the individual candidate. As part of the mark scheme, there is a mark allocation for individual initiative displayed both in the field and in the writing up of the enquiry.

What are the basic requirements of the enquiry?

Each investigation should show evidence that data has been collected outside the classroom. The enquiry write-up (fieldwork project) must include the prescribed sections (clearly headed by the candidate) as set out in the Fieldwork Enquiry Assessment Form (*see Appendix VI*).

What format can the fieldwork project take?

The fieldwork project can be produced either as a word-processed printed document or as an electronic presentation (slide show).

What is the limit on length?

One of the skills which the exercise is intended to develop is economy in the presentation and summarising of data. If a paper format for the project is used, it should be approximately 1,000 words in length, excluding titles, diagrams, references etc. and no more than ten A4 pages. If an electronic presentation format for the project is used, it should not exceed ten minutes or twenty slides.

How much time should be taken for the enquiry?

At least one day should be set aside for the collection of data. It is recommended that the enquiry write-up is completed within school and should not take longer than half a term to complete.

Deadline dates for submission

15 October (Autumn CE)

15 January (Spring CE)

15 March (Summer CE)

How much help should be given to the candidate?

Whilst teachers need to offer guidance, the enquiry write-up must be the candidate's own work. Any additional teacher's help should be declared on the fieldwork assessment form. Parents must not help with this enquiry.

How should the enquiry be submitted?

It is possible to submit the fieldwork project and marks to senior schools in the following ways:

- (i) by post, enclosing a separate Fieldwork Enquiry Assessment Form (*see Appendix VI*) for each candidate. Please use a secure method (e.g. recorded delivery) to ensure that projects do not go astray;
- (ii) saved as word-processed documents or presentation slide shows on either a CD Rom or a memory stick, which is then posted with an Individual Fieldwork Enquiry Assessment Form (*see Appendix VI*) for each candidate.

It is also possible, with senior school approval, to submit, for each candidate, the Fieldwork Enquiry Assessment Form only.

It is important for junior schools to liaise with senior schools about the submission of projects and/or forms. If fieldwork projects are not sent to senior schools, they should be returned to the candidates after the examination period.

APPENDIX IV

RECOMMENDED CRITERIA FOR MARKING FIELDWORK ENQUIRY

Mark

INTRODUCTION (4 marks)

-
- | | |
|-----|---|
| 4 | Clearly-stated aims and hypotheses/key questions; a suitable location map showing where the fieldwork was conducted; useful and relevant background information to the particular investigation or fieldwork venue. |
| 2-3 | Less clearly-stated aims and/or hypotheses or lack of background information or absence of a location map. |
| 0-1 | Unclear aims or lack of a clear focus for the investigation. |
-

Mark

METHODS OF DATA COLLECTION (8 marks)

-
- | | |
|-----|--|
| 7-8 | Two different well-chosen and clearly-explained methods of data collection, illustrated with photographs and/or diagrams to show apparatus and techniques; justification of the choice of methods. |
| 5-6 | Two methods of data collection explained, but lacking detail or methods unsupported by photographs and/or diagrams to show apparatus and techniques or too many methods/techniques explained. |
| 3-4 | Only one method explained in detail, even though there may be reference to a second method. |
| 0-2 | Methods poorly chosen or explained. |
-

Mark

RESULTS/PRESENTATION OF DATA (8 marks)

-
- | | |
|-----|---|
| 7-8 | Excellent data presentation; accurate use of two different yet appropriate techniques; clear and precise; at least one technique which is sophisticated/innovative. |
| 5-6 | Two different and appropriate types of data presentation used and accurately presented/plotted or too much repetition of similar results. |
| 3-4 | Maximum mark where there is any weakness/inaccuracy/inappropriateness or if there is only one technique, however sophisticated. |
| 0-2 | Only one simple technique; alternatively, one mark for two techniques, even if both are inaccurate or irrelevant. |
-

Mark

DATA ANALYSIS (8 marks)

-
- 7-8** Clear and thorough explanation of the findings with close reference to, and quotation from, primary data collected; excellent understanding and thorough explanation of the geography involved; accurate use of a wide range of geographical terminology; valid conclusions and link back to hypotheses/key questions.
-
- 5-6** Sound understanding and explanation of the results and of the geography involved; use of geographical terminology; reference to primary data collected; some justification of the choice of methods.
-
- 3-4** Some interpretation of the results; some attempt to explain the geography involved.
-
- 0-2** Little explanation of findings and/or justification of methods; invalid conclusions.
-

Mark

EVALUATION (4 marks)

-
- 3-4** Strong evaluation; several suggestions for improving the project.
-
- 0-2** Weak evaluation; few or no suggestions for improving the project.
-

Mark

FIELDWORK EXPERTISE (8 marks)

-
- 7-8** Candidate has shown excellent initiative/efficiency/reliability/cooperation/leadership in the field; evidence of individual learning and research; candidate has completed the write-up independently and within the time allowed.
-
- 5-6** Candidate has completed the data collection accurately and efficiently but without distinction; project write-up has been completed on time and with a minimum of assistance from the teacher.
-
- 3-4** Candidate has not shown competence in the field **or** has failed to collect and record some data accurately **or** has been unable to complete the project write-up on time without the assistance/intervention of the teacher.
-
- 0-2** Candidate has shown little or no interest in/regard for the task set **or** candidate has been uncooperative in the field **or** candidate has failed/struggled to complete the write-up within the set guidelines and/or time.
-

APPENDIX V
